

# INDIVIDUAL AGENT LINES

Individual agent lines allow every salesperson to have their own lines to give customers that are tracked, recorded, and ring directly to them.

## TEXTABLE AGENT LINES

All agent lines can be text-enabled, so customers can text the agent if they prefer to connect that way. Texts are automatically assigned to the right agent.

## OUTBOUND CLICK TO CALL ROUTING

Outbound click to calls made by agents with agent lines will automatically show the caller the right agent line in the outbound caller ID.

## AUTO-ASSIGNED CALLS

All inbound calls to agent lines are automatically assigned to the agent to improve proper CRM follow up and team accountability.

## VOICEMAIL TEXT ALERTS

Voicemails left on agent lines will be transcribed and texted to the agent.
